

GATEWAYS · DIN RAIL

IP Interface

SKU ASIPC-00/00.S · DIN rail mounting

DESCRIPTION

KNX IP interface, 2SU MDRC. The bridge between the KNX line and the IP network — ETS programming and visualization access.

IP Secure and Data Secure provides bidirectional TCP/IP connection between PC and KNX for efficient bus programming and control. It supports up to 4 simultaneous connections. Enhanced features include encrypted email transmission, an integrated time server for synchronizing date and time on the KNX bus, and support for extended group addresses.

Firmware is undateable, allowing ongoing improvements, while secured access via IP Secure with a security key ensures robust protection. Fast application downloads are enabled through long frame support.

RJ45 socket for 10/100Base-T, IEEE 802.3 network, auto sensing, support max.

Power: KNX Bus only

SPECIFICATIONS

SKU	ASIPC-00/00.S
Mounting	DIN rail, 2SU MDRC
Function	ETS programming · visualization
Network	Ethernet, RJ45
Bus	KNX TP

APPLICATION

ETHERNET PORT

RJ45 to building network

KNX TP CONNECTOR

Line-side bus terminal
